

INTRODUCING

**new!**

**"THERMAL COMFORT"™  
PAINT ADDITIVE**

After 4 years of research and an MSc (Distinction) Thesis, our Technical Director is now happy to offer this advanced new insulating product to you.

Our additive is proven to:

- \* Improve the insulation of walls, ceilings, etc. (by 30% for solid walls)
- \* Increase temperature of treated surface
- \* Reduce condensation risk
- \* Improve thermal comfort
- \* This all leads to smaller heating bills!

A treated room will heat up quicker than using any other type of insulation

**IT IS THE MOST AFFORDABLE INSULATION METHOD AVAILABLE!**

Its bright white formula does not affect the colour of the paint.

**It is completely inert and non-allergenic.**

It can be mixed with most commercially available paints.
